Colour Coding

We understand that cross-contamination is one of the highest risks in the spread of infection. Sabco Professional offers an extensive colour coded range of products to ensure the right product is used to clean the right area, minimising the risk of cross contamination.

The following colour coding scheme is the most accepted by Australian Hospitals.

THE BENEFITS OF MICROFIBRE

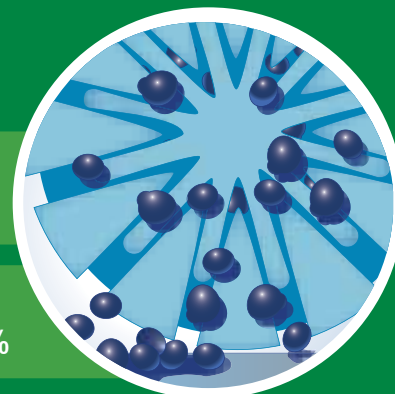

Microfibre is constructed of a blend of polyester and polyamide and is safe to use on even the most delicate surfaces.

Polyester serves as the scrubbing and cleaning fibre.

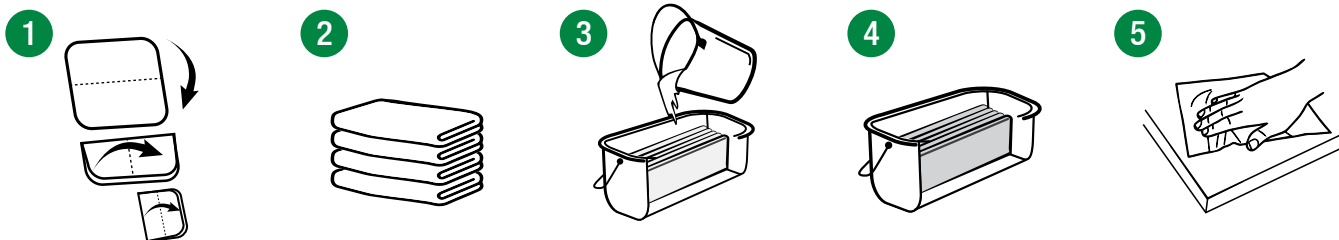

Polyamide performs as the holding and quick drying fibre.

Polyamide absorbs water 10% - 30%

Polyester absorbs grease 70% - 90%

INSTRUCTIONS FOR CLOTH PREPARATION

Cloths should be stacked in the bucket of the same colour by folding them in quarters, and stacking them horizontally in the bucket (shown in the diagrams above). Prepare the solution in another bucket and pour over cloths in the relative bucket.

THE PROFESSIONAL FLAT MOP ADVANTAGE

Bucketless cleaning, drier floors and superior results.

Sabco's innovative professional flat mopping range offers ergonomic solutions to effectively and efficiently clean large surface areas. The flat base provides even pressure for superior floor contact and also makes them suitable for cleaning vertical surfaces such as walls, ceilings and stairs.

Benefits of Flat Mopping:

Effective Clean:

- Improved dust removal
- Better bacteria removal
- Rotating head gets around and under objects with ease
- Even weight distribution to the floor

Hygiene:

- Less water= reduction of bacteria proliferation
- Reduces cross-contamination

Cost Saving:

- Better durability
- Less chemicals
- Reduced costs to clean and dry microfibre pads vs conventional mops (Pad dries without heat)

Time Saving / Efficiency:

- Larger and quicker surface coverage
- Minimal and quick preparation
- Limited operator training required
- No need for wringing and rinsing

Ergonomics:

- Lighter weight than conventional mops
- No heavy bucket required
- Telescopic handle for easy reach
- Better control of the mop

Versatility

- Suitable for all smooth floors, walls/ vertical surfaces, ceilings (operation theatre; clean rooms), stairs, windows and more.

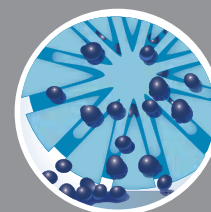

THE MICROFIBRE DIFFERENCE

Why Microfibre?

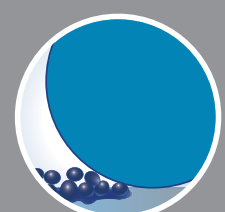

The innovative characteristic of this thread is that it is extremely fine — up to 100 times finer than a human hair — allowing it to penetrate even the smallest cracks in the surface. The result is an in-depth cleaning action that removes the smallest forms of dirt, pollen and bacteria out of microscopic crevices.

MICROFIBRE MOPS GUARANTEE HIGH PERFORMANCE!

Each microfibre thread has wedge-shaped borders, collecting dust with a micro-abrasive action that traps and retains it in the fibre.

COMMERCIAL MOPS

We've got you covered.

Sabco's Commercial Mop range offers quality and durability guaranteed. We've got you covered — our comprehensive mop range is manufactured from the highest quality yarns and textiles. With industry standard colour coding systems.

Our four highest quality mop yarns and textiles include:

MICROFIBRE

Traps removed dust or soil, lifting it away. Is extremely absorbent — able to absorb and hold up to six times its weight. Microfibre can minimise the need for chemicals.

TEXTILE BLEND

Typically cotton, polyester, rayon and acrylic. Engineered to be more hard-wearing and absorbent and manufactured to result in less lint.

COTTON

Traditional 100% pure cotton for maximum absorbency and durability.

POLYCOTTON

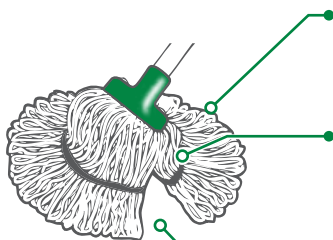

A blend of cotton and polyester yarns. Will not lint as much as cotton does, so is preferable for mopping rougher surfaces. Less absorbent than straight cotton so better in applications where fluid retention isn't desired (e.g. Polish application).

CONTRACTOR

QUICK AND EASY?

Contractor: Traditional, cut ends are easily rinsed for quick cleaning (best used when laundering is not imperative).

LOOPED

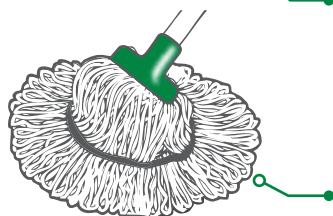

WILL THE MOPS BE REPEATEDLY LAUNDERED?

Looped: Designed to cater for repeated laundering, the tail banding prevents tangling and knotting and looped ends prevent linting.

Loop Banded (no ferrule — for use with mop clips): The absence of a ferrule is kinder to the washing machine.

IS THERE A LARGE AREA TO MOP?

Looped: The butterfly format allows for greater coverage.

ROUND

IS A PRESS WRINGER BUCKET BEING USED?

Round: Specifically designed to be used in press wringer buckets, as the continuous banding can cause them to jam in a roller bucket.

FLEX-TEC HANDLE

Avoid accidental dents & bent handles with the innovative Sabco Flex-Tec Handle (Pg 56). Made from recycled plastic reinforced with fibreglass.

SABCO COMPLETE CLEANING SOLUTIONS

Why should you use Sabco floor pads?

Manufactured to the highest quality standards, Sabco's floor pad fibres are consistent in thickness and density, making them outlast all other competitor pads. Sabco floor pads are Eco friendly with 100% of our Polyester Fibre coming from post consumer & industrial recycled waste.

Cycle of cleaning:

STRIPPING: Removing or lifting dirt & floor finish using a stripping pad, stripper solution and machine.

SCRUBBING: Use of a scrubbing pad & solution with scrubbing machine to remove soil leaving the floor finish primarily intact.

POLISHING (BUFFING): At lower speeds (from 300 to 500 rpm) using a traditional single disk machine.

BURNISHING (BUFFING): To buff a floor at very high speeds greater than 1000 rpm, to produce a high gloss and hard slip resistant finish.

STRIPPING

PAD NAMES	DESCRIPTION

TWISTER™ DIAMOND CLEANING SYSTEM

TWISTER™ for a brilliant cleaning result everyday!

Twister™ is a revolution in floor cleaning using floor pads encrusted with billions of microscopic diamonds to transform dull, worn floors into clean, glossy and brilliantly polished floors.

Outstanding Quality

Clean floors with high gloss every day

Cost Efficient

Faster, easier and cheaper cleaning

Environmentally Sustainable

Eco friendly cleaning

User Friendly

The same routine with better results

TWISTER™ – THE FUTURE OF RETAIL CLEANING

The benefits:

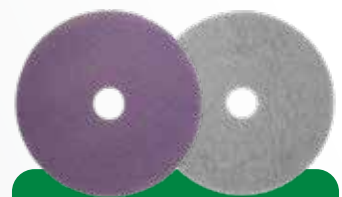

Cut costs – periodic maintenance, polish and waxes are no longer needed to create clean and shiny surfaces.

Increase the shopping experience – bright, clean and shiny floors will welcome your customers day after day.

Environmentally sustainable cleaning – requires only water in cleaning (no chemicals).

Increase space & product availability – reduces cleaning time, eliminating the need to seal off areas due to periodic maintenance. Reduce bacteria on floors by up to 80%.

Easy implementation – same routine as before (same machinery).

- RPM: Up to 3500
- Soft fine fibres will not damage the finish on uneven floors
- Reduces airborne dust

KEEPING IT GREEN

Microfibre pads produce minimal dust when burnishing – the dust and soil are held within the pad and are not released into the air. Efficient mechanical cleaning with microfibre pads can reduce chemical use.

MICROFIBRE CLEAN

A cleaner clean! Microfibre traps dirt instead of moving it around. It can minimise the need for chemicals (leading to cost benefits). Microfibre used with mechanical devices can remove soils from surfaces.
